

Seeing Machines Limited (“Seeing Machines” or the “Company”)

10 April 2026

Seeing Machines responds to alleged cyber threat

Seeing Machines Limited (AIM: SEE), the advanced computer vision technology company that designs AI-powered operator monitoring systems to improve transport safety, announces that approximately 10 days ago it was informed of an alleged cyber threat targeting the Company.

Seeing Machines is aware that a third party has named the Company online in connection with claims that some of its data has been accessed.

The Company understand this news may cause concern and wish to assure all stakeholders that immediately upon becoming aware of the claim it was, and continues to be, thoroughly investigated as a priority.

Seeing Machines has not identified any relevant events in relation to the claim, nor has any unauthorised access to Seeing Machines systems or data has been identified at this time.

All operations are running as normal, and sophisticated monitoring systems have been implemented to ensure the Company is aware if there are any further developments. Nonetheless, the Company will continue monitoring of its systems over the coming period to ensure the ongoing safety of all systems and data.

Seeing Machines takes cyber security seriously and are committed to keeping all stakeholders updated if there are any further relevant developments.

The Company is also liaising with the relevant authorities in response to the claim, alongside various experts across the cyber security industry.

Seeing Machines would like to thank its stakeholders for their ongoing support. Please direct any questions to our dedicated support team by email on infosec@seeingmachines.com.

About Seeing Machines (AIM: SEE), a global company founded in 2000 and headquartered in Australia, is an industry leader in vision-based monitoring technology that enable machines to see, understand and assist people. Seeing Machines is revolutionizing global transport safety. Its technology portfolio of AI algorithms, embedded processing and optics, power products that need to deliver reliable real-time understanding of vehicle operators. The technology spans the critical measurement of where a driver is looking, through to classification of their cognitive state as it applies to accident risk. Reliable “driver state” measurement is the end-goal of Driver Monitoring Systems (DMS) technology. Seeing Machines develops DMS technology to drive safety for Automotive, Commercial Fleet, Off-road and Aviation. The company has offices in Australia, USA, Europe and Asia, and supplies technology solutions and services to industry leaders in each market vertical.
